# Anaphora Semantic Interpretation Reinhart Tanya

**anaphora and semantic interpretation: a reinterpretation ...** - reihart's theory of the syntax and semantics of anaphoric relations is best known from her book *anaphora and semantic interpretation* (reihart 1983a). my exposition mostly follows the more recent summary in grodzinsky & **coreference and bound anaphora - chris kennedy** - establish some specific semantic interpretation procedures for pronouns. a final consequence of this picture, to which we shall return in section 2.1., is that a sentence containing an optionally coreferential pronoun is **1. what is anaphora? lecture 5. introduction to issues in ...** - syntactic form and semantic interpretation of single sentences, and the relevant question is not what the pronoun refers to, but what quantifier phrase is binding it. **a note on backward anaphora1 - unisi** - semantic computation of constituents, and the global discourse level. 2 1. introduction in generative approaches to anaphora, a persistent view is the distinction between binding and coreference, dating back to reihart (1983, 1986).2 true binding is syntactically constrained by a c-command requirement (reihart's bound anaphora condition), and results in the binder's argument position ... **a statistical model of nominal anaphora - brown university** - a statistical model of nominal anaphora keith b. hall may 21, 2001 abstract in this paper, we present an analysis of nominal anaphora along with a probabilistic model of nominal anaphora resolution. **1. schedule for today and tentative schedule for final ...** - semantic and syntactic typology of anaphora 2.1. the semantic dimension of anaphora reihart wasn't the first to point out the important distinction between bound variable anaphora and coreferential anaphora, but she is the key figure in seeing the significance of that distinction for an account of the syntax and semantics of binding. reihart's central thesis (reihart 1983a, 1983b): the ... **cataphora - hebrew university of jerusalem** - cataphora edit doron (to appear in the encyclopedia of hebrew language and linguistics) cataphora is the term used for backward anaphora (→ anaphora): coreference **anaphora by pronouns - opus 4** - anaphora by pronouns bernd wiese abstract an adequate conception of anaphora is still a desideratum. considering the anaphoric use of third-person personal pronouns, the present study contributes to the solution of the question of what anaphora is. major tenets of generative approaches to pronominal anaphora are surveyed; descriptive and methodological problems with transformational as well ... **reihart 1982 pragmatics and linguistics: an analysis of ...** - reihart 1982 pragmatics and linguistics: an analysis of sentence topics aaron braver ling 140a 13 march 2007 1 two types of topic (1) mr. morgan is a careful researcher and a knowledgeable semiticist, but his **syntax, binding and patterns of anaphora - rutgers university** - 1 afranaph technical report #1 syntax, binding and patterns of anaphora ken safir, rutgers university - version 1.0 preface since the inception of the afranaph project, the theoretical motivations for our interest in **disjoint reference and the typology of pronouns** - sag 1992, reihart and reuland 1993). reihart and reuland explicitly argue that principle a is defined on syntactic predicates and principle b on semantic predicates. **bibliography semantic structure, in kreiman and ojeda ...** - bibliography bach, emmon and barbara h. partee: 1980, "anaphora and semantic structure", in kreiman and ojeda, 1980, pp. 1-28 beth, e. w.: 1964, the foundations of ... **the cognet library : references collection** - data (i.e., some native speakers' intuitions) as "syntactic" and others as "semantic." but we cannot determine a priori whether a certain but we cannot determine a priori whether a certain phenomenon is best explained in syntactic or semantics terms. **adyghe language (west caucasian, the circassian branch), with** - even more striking is the ability of pronominal arguments to undergo upward semantic binding, quite contrary to the well-known generalization that semantic binding (e.g. bound anaphora) requires syntactic
